

PRODUCT DATA SHEET

ACO BOOSTER BW15

Additive to Pearl Caustic Soda

Description

ACO BOOSTER BW15 is a powdered additive for addition to Pearl Caustic Soda to produce a formulated bottle washing powder.

Features/Benefits

- Foam Suppressed, it is suitable for use in conditions of high pressure.
- Excellent wetting/water softening, suitable for use with water of up to 500ppm with complete sequestering at recommended concentrations.
- Completely soluble, leaves no insoluble components.

Discussion

ACO BOOSTER BW15 in conjunction with caustic soda pearl is highly effective in the removal of a wide range of organic soils and aids in the control of scale deposition in hard water applications. It contains a low surfactant to improve wetting, but retains its suitability conditions for high turbulence in bottle washing. ACO BOOSTER BW15 is used in the brewing and beverage sectors for bottle washing.

How to Use

Use ACO BOOSTER BW15 at a recommended 10%v/v addition to Pearl Caustic Soda. Ensure that the mixer is clean, dry and switched on. Add in half of the total Pearl Caustic Soda, then add all of the ACO BOOSTER BW15 and mix well for suggested 10 minutes. Add the remaining Pearl Caustic Soda and mix for a further 10 minutes.

Properties

Form	Powder
Colour	White
Odour	Typical

The above data is typical of normal production and should not be taken as a specification.

Contents

Sodium Carbonate, sequestrants and surfactant.

Precautionary Statement

Full guidance on the handling and disposal of this product is given in a separate material safety data sheet.
